## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-26, 29-35 and 37-38 drawn to fraud detection or control, classified in class 379, subclass 114.14.
  - II. Claims 27-28, drawn to Interexchange signaling, classified in class 379, subclass 229.
  - III. Claim 39, drawn to Centralized switching system, classified in class 379, subclass 242.

The inventions are distinct, each from the other because:

2. Inventions I. Claims 1-26, 29-35 and 37-38, II. Claims 27-28 and III. Claim 39 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as for fraud detection or control, whereas invention II has separate utility such as for use in correlation information, and invention III has separate utility such as for use in upgrading a switch. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, as well as, Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
